Personal Details

Date of Birth : 15/04/2001

Nationality : Syrian

Gender : Male

Objective

Self-motivated developer specializing in React, with hands-on experience building training projects using JavaScript, JSX, and CSS. Skilled in component-based architecture, hooks, and responsive design. Actively learning Redux and modern frontend workflows through practical applications. Highly adaptable with strong problem-solving abilities. Seeking first professional opportunity to grow and deliver clean, efficient code.

Education

Damascus university

2019 to present

Mechanical Engineering

Programming Fundamentals Diploma At Route Academy (Egypt)

Understand programming fundamentals with c++ and java and Studying OOP, Data structures & algorithm With c++ and Practicing on Problem Solving .

Frontend Development With React At Route Academy (Egypt)

Master HTML5 semantics and CSS3 Flexbox/Grid for pixel-perfect layouts. Dive into modern JavaScript (ES6+) with emphasis on arrow functions, destructuring, and async/await patterns. Build 3 vanilla JS projects (Todo App, Weather Widget) to solidify DOM manipulation skills before touching React. Includes Git crash course for version control basics and collaborative workflows

Transition to React with JSX syntax, component lifecycle, and hooks (useState/useEffect). Create dynamic UIs using React Router v6 for navigation and controlled forms. Focus on component architecture by building a Reddit-style comment section. Implement CRUD operations with Firebase REST API. Weekly code reviews emphasize best practices like prop-types and folder structure.

Skills

Html 5
